

Emmanuel Villermaux received his PhD from the University of Paris VI, Pierre & Marie Curie, in Grenoble where he was appointed at CNRS, and where he obtained the habilitation from Joseph Fourier University. He now holds a position of distinguished Professor at Aix Marseille University, and at the Institut Universitaire de France. He is a Fellow of APS, and of Euromech. His interests are in the mechanics of deformable bodies in the broad sense, from fluids to solids, with a particular taste for mixing and fragmentation.
